

How can I change PipBoxer input variables?

Friday, 29 February 2008

Last Updated Friday, 29 February 2008

While PipBoxer is attached to a chart use the following steps to change the input variables of it.

- Open the chart that PipBoxer is attached to it.
- Press F7. A dialog box appears. Click the "Inputs" tab (see image).
- Scroll down to find the variable you need to change.
- Double-click on the value of the variable. Make necessary changes.
- Click OK to exit the dialog box (You might need to click OK twice).
