

## PipBoxer at News Time

Sunday, 09 March 2008

PipBoxer is equipped with some features and tools that helps it to deal with volatile market the same as it deals with non-volatile market. [Click here](#) to see a list of tools that PipBoxer uses.

For example on Friday March 7, 2008 the day that US Non-Farm Payroll report was released PipBoxer closed 6 trades and made hundreds of pips in our live account. [Click here](#) to see the report.

You as the user have also the ability to disable PipBoxer new trades in one or both directions (long and/or short) to avoid it from entering trades at news time. Despite this feature PipBoxer is capable to manage open trades. This feature gives you more power to deal with exceptional situations.
